

AFT Flow Expert Package™

Need Help With Your Fluid System?

Extend your team with an experienced fluid systems engineer assigned specifically to you. Leverage AFT flow experts to augment your own expertise. Reduce your learning curve and get up to speed quickly using AFT software.

Package Details

AFT Flow Expert Packages provide consulting services beyond typical technical support requests on the installation, upgrade assistance, and functionality of AFT software. With AFT Flow Expert Package™ you can:

- Receive online training on specific topics of your choice
- Request help on model results interpretation
- Get a second opinion of your assumptions, modeling choices and reports
- Have an expert double check your modeling input and point out common modeling mistakes or suggest better ways to model the desired behavior
- Discuss with an expert alternative solutions for hydraulic problems
- Help new hires get acquainted with AFT software
- Help launch AFT software within your company and reduce your learning curve
- Receive guidance in how to model pumps and pump-system interaction, relief valves and relief systems, surge suppression equipment, slurry pipelines, system transients
- Get access to a consulting engineer assigned as your primary point of contact
