

Applied Flow Technology eLicense Privacy Statement

Anonymous Data Transmitted

The use of an eLicense requires some anonymous data (data which cannot be used to identify an individual) that must be transferred to validate and authenticate the license usage. Without this data transfer, the eLicense will not be available and other Rights Management methods will be required to access the application.

Information Transmitted

The following anonymous data will be transmitted in order to validate and obtain a license:

- Operating system
- CPU type and number of cores
- Memory
- IP Address of the Internet gateway used
- Device name and form factor

No personal contact information is collected as part of the eLicense.

Usage of Information

The information transmitted will only be used to administer the eLicense Rights Management. No data will be transmitted or sold, in whole or in part, to a third party.

Data Storage and Security

The information will be stored in servers based in the United States of America which are maintained by US staff in a private, not public, cloud. Applied Flow Technology is committed to help protect the security of the information and uses a variety of security technologies and procedures to help protect the data from unauthorized access, use, or disclosure.

Opt-Out of Data Transmission

You may at any time opt-out of using an eLicense in which case other Rights Management methods will be used to access the application.

Changes to this Statement

Applied Flow Technology may occasionally update this privacy statement. When we do, we will also revise the “last updated” date at the bottom of the privacy statement. We encourage you to periodically review this privacy statement to stay informed about how we are helping to protect the information we collect.
